

# Information about coronavirus

Coronavirus can make you sick.

Coronavirus can cause cough, sore throat,

headache and runny nose.

Coronavirus can also cause fever.

Some people may develop trouble breathing.

Coronavirus is contagious.

When you cough, coronavirus can infect

other people.

It is therefore important to cough into

the crook of your arm.

Coronavirus can be passed on when you are near other

people. It is therefore important

to not be around a lot of people at the same time.

It is also important not to hug

or shake hands with other people.

Do not touch your face with your hands either.

The virus can also be passed on when you touch things.

It is therefore important that you wash your hands often

with soap and warm water.

Dry your hands with a paper towel.

Discard the paper towel in a wastepaper basket.

If you have a headache or sore throat, you should stay

home.

You should also stay home if you are coughing, or have a

runny nose or fever.

This makes it harder for the virus to infect other people.
